

Home Ice Determination

1 Quarter Final Home ice:

If a group winner from round robin play (1st place after all round robin games and any tie breakers needed to determine 1st place) is involved in a quarter final game, they will have home ice.

Any other quarter final game that does not include a group winner from round robin home ice is determined from regular season standings. For example, 2nd Place Group A versus 3rd Place Group B home ice will go to the higher team from regular season standings.

2 Semi Finals Home Ice:

If a group winner from round robin play advances directly to a semi final, they will have home ice for their semi final.

All other semi final games that have both teams advancing from quarter final games will go with home ice determined by regular season standings.

3 Finals, Seeding and Play In Games Home Ice:

Home Ice will be determined by regular season standings.
